

AGV Mixers

OVERVIEW

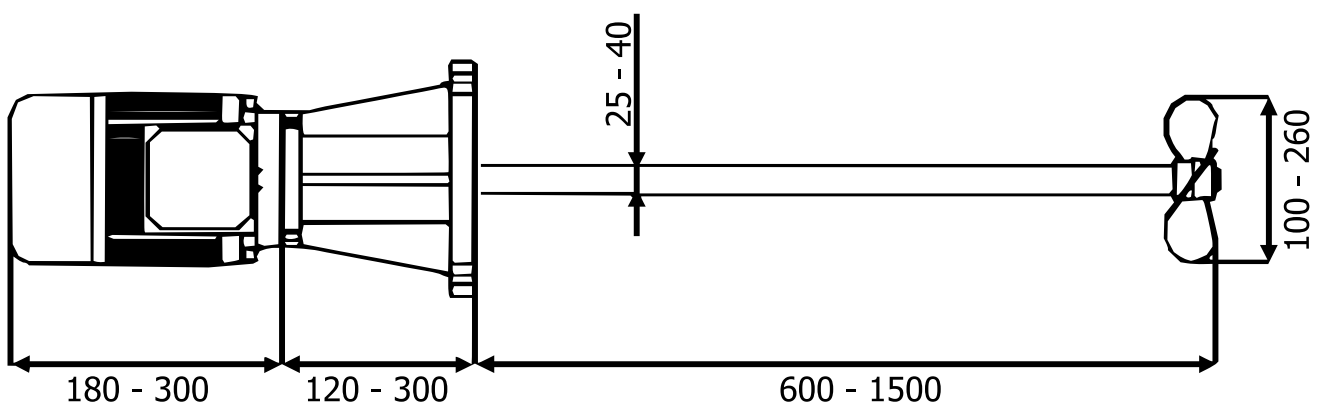

AGV Mixers are designed for use with a wide range of tanks with a variety of sizes. shaft lengths of 600 to 1500 mm). With either single or three phase motors and a choice of shaft material, the AGV mixers are suitable for any dosing system which requires a high-speed mixer. The AGV range feature a support flange as standard for tank mounting, allowing for ease of installation.

TECHNICAL FEATURES

- High speed mixers (900 or 1400 RPM)
- Available with a range of shaft materials to ensure chemical compatibility (SS304 as standard; options include PP, AISI316 and Abcrite)
- Shaft length from 600 to 1500 mm
- Three phase motors as standard
- Single phase motors available for mixers with shafts of 800 mm or less
- Motor outputs from 0.18 to 1.5 Kw

DIMENSIONS
