

Tanks and Bunds

OVERVIEW

Etatron Chemical Holding Tanks are designed for chemical dosing applications. We can supply regular tanks of capacities up to 5000 litres and produce bespoke models up to 30,000 litres. The Chemical Holding Tanks come in vertical and open top forms. Open top tanks can be used to contain smaller vertical tanks for additional leak protection.

TECHNICAL FEATURES

- **Capacity** From 60 to 5000 Litres with many graduations for regular builds. Maximum 30,000 litres for bespoke builds.
- **Shape** Vertical cylindrical, conical base and rectangular.
- **Metal Frames** For larger builds metal frames may be fitted for support - providing a scaffold for mixers and wheels for mobility. Ladders and platforms are available for the very largest tanks. All frames can be painted in a RAL coded colour.
- **Safety** Available with open topped or lidded bunds for spillage protection. Metal brace plates for supporting mixer equipment can also be supplied to fit any regular tank capacity.
- **Materials** MDPE/HDPE rota-moulded bodies for chemical compatibility and UV resistance.
- **Accessories** Optional valve fittings and level sight glass.
