

AGV MIXERS

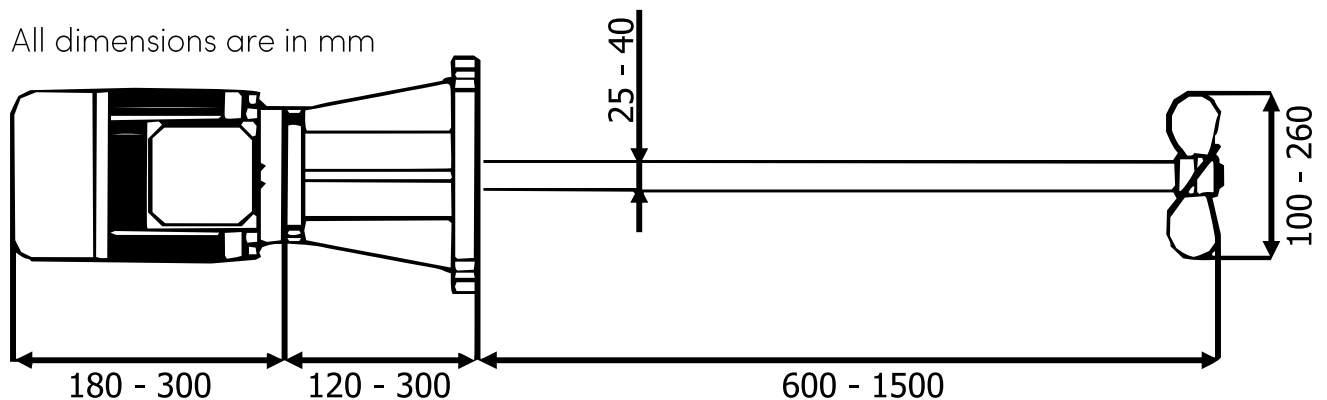

TECHNICAL FEATURES

- High speed mixers (900 or 1400 RPM)
- Available with a range of shaft materials to ensure chemical compatibility (SS304 as standard; options include PP, AISI316 and Abcrite)
- Shaft length from 600 to 1500mm
- Three phase motor as standard, 230-400V
- Single phase motors available for mixers with shafts of 800mm or less, 230V
- Motor outputs from 0.18 to 1.5 kW

DIMENSIONS

All dimensions are in mm

AGV Mixers are designed for use with a wide range of tanks with a variety of sizes (shaft lengths of 600 to 1500 mm). With either single or three phase motors and a choice of shaft material, the AGV mixers are suitable for any dosing system which requires a high-speed mixer. The AGV range feature a support flange as standard for tank mounting, allowing for ease of installation.
